

Student Residences Packed, Waiting Lists Lengthening

Count yourself fortunate if you secured a room in one of the student residences. The "No Vacancy" sign is out at each of the six residences and the waiting lists are growing daily.

As of 26 August, there were 75 names on the Lister Hall list. David Bruch, Director of Housing and Food Services, says long-time employees can't recall the residence ever being booked to capacity.

Michener Park, Garneau and HUB could soon have in excess of

400 students on their waiting lists, he said.

Pembina Hall and Faculté Saint-Jean are also filled to the brim.

As per usual, emergency housing will be available at Lister Hall until mid-September. Two multi-purpose rooms, each with 24 beds arranged "barracks style," are in use. Each bed is rented on a per night basis.

An academic wing, that is, a "low social" area was started last year and has been expanded this year.

Lister Hall also has a "Pembina Floor" (graduate students and mature students who are waiting for rooms in Pembina Hall) and a "little more than one wing" of students who are waiting for rooms at Faculté Saint-Jean.

This summer, for the first time, three residences—Pembina Hall, Faculté Saint-Jean, and one floor of Lister Hall—remained open at reduced rates.

At this time last year, Lister Hall was filled but a number of students

were there on one-month contracts and left at the end of September. There are no such contracts this year because everyone at Lister has signed either an eight-month contract or a four-month contract. There is simply no room this year for anyone interested in the one-month contract.

Bruch advises accommodation seekers to put their name on Lister's waiting list first because it's a certainty that some people on the list will try their luck elsewhere. They should also check with the Housing Registry in the Students' Union Building and, of course, read the listings in the press. Bruch notes that Edmonton currently has a high vacancy rate compared with other cities in Canada.

A single student looking for simple accommodation has a chance of being successful; married students or a group of students are going to be up against it, Bruch says.

The residences' 1,019 rooms (single and double) can accommodate 1,200 people.

Obviously students are finding the residence lifestyle to their liking. Housing and Food Services is making a concerted effort to round out residence life by emphasizing such elements as an academic program component. For example, the department, which had installed a number of computer terminals, recently hired a teaching assistant who is knowledgeable about computing to be available to residents for consultation.

According to Bruch, "Residences are starting to become and will continue to evolve as the place to live if students really want to enjoy University and are serious about their studies." □

Wall of Fame Valhalla for Athletes and Builders

Bob Steadward and Peter Meekison unveiled the University's Sports Wall of Fame on 28 August. The Wall, located in the foyer adjacent to the Office of the Dean of Physical Education and Recreation (W1-34, a few paces north of the Main Gymnasium), pays tribute to outstanding athletes and builders of university sport. Six of the first 12 inductees were present at the unveiling. They were: Ethel Barnett Cuts and Brian Fryer (pictured), W.A. (Bill) Shandro, Beverly Richard Spencer, Terry Danyluk and Susan Natrass. At the Second Annual Sports Wall of Fame Dinner (18 September at the Westin Hotel), the names of six more inductees will be announced.

Far-Flung Projects: Our Doctor(s) in Cameroon

The Faculty of Medicine's international health project got under way at the end of August with the departure of Ron Lett, his wife, Judy, and their three young children, for Yaoundé in the Republic of Cameroon. For the next two years the family will live in Cameroon while Dr. Lett, a general physician and surgeon, gets the project going as liaison-officer educator. Three other Faculty members will join him later, for shorter periods.

The broad purpose of the project, set up between the Faculty of Medicine, and Le Centre Universitaire des Sciences de la Santé de l'Université de Yaoundé, Cameroon, is to help improve the over-all health of the people of Cameroon. (Infant mortality there is 113 per thousand—in Canada it is 12 per thousand—and life expectancy is 44 years.)

The focus will be on two areas. One is development of Primary Health Care, a concept based on using technically trained people (village health care workers, nurses, and nurse practitioners),

rather than doctors, to treat most of the population.

The other area is the development of post-graduate medical education.

In the immediate future, the focus will be on curriculum development and on developing the surgical skills of rural physicians so that fewer people will have to come in from the countryside to major cities for surgical care.

Long term, the aim is to develop a self-sustaining group of medical professionals, with training relevant to their own country, able to develop and sustain a realistic health care system for Cameroon.

Dean Wilson, John Taylor (Emergency, UAH), and Henry Pabst (Pediatrics) are closely involved in the project, and the Faculty of Medicine is funding Dr. Lett's salary for two years. Other sources of funding are being sought.

The University of Yaoundé has a medical school, graduating 60 people a year, and instruction is in both French and English. (Dr. Lett

and his family spent six weeks this summer learning French in Quebec.) This is the only medical school in West Central Africa that can cater to the populations (approximately 9,409,000) of Chad, Central African Republic, Congo,

and Gabon, all of which are French-speaking.

Note. The recent leak of poisonous gas from the volcanic Lake Nios, situated about 400 kilometres northwest of Yaoundé, will not hold up the project. □

Education Centre Corridor Resembles Art Gallery

The Faculty of Education has something to share with everyone who passes through the second floor corridor in Education North and Education South.

A 29-piece, permanent collection of children's art has rendered the previously unadorned area attractive to the point that faculty and students who normally breeze through the area will want to slow their pace and view the collection. Everything is the work of Alberta children between the ages of 3 and 12. The art is pure, colorful and spontaneous and has the capability of putting the viewer in a wistful mood. The driving rain storm, the cozy tree house, the bird on the wing . . . similar paintings may well have been attempted by us in years gone by.

The Faculty has always taken an interest in the development and well-being of youngsters and wanted to display some representative artwork.

"We wanted a high traffic location and we found that, in hanging the collection, virtually everyone who passed by stopped and looked and told us how much the pictures improved the corridor," said Pat Rafferty

(Elementary Education). The Faculty's Planning Officer, Ken Machon, dealt with offers to buy paintings and suggestions that if a painting wasn't going to go on the wall a home could be found for it in so and so's office. He professed surprise at the quality of the paintings and is hopeful that the collection will grow over the years.

Professor Rafferty is delighted with the display because she has long harbored the idea of acquiring a collection of children's art. Lacking the resources to launch a public appeal, she turned to the Edmonton Public and Separate School Boards, the Edmonton Gallery and Alberta Culture. Those bodies were most responsive and gathered about 150 paintings and submitted them to Professor Rafferty.

A note at the bottom of most paintings names the artist, the school or day care and the teacher.

Professor Rafferty and Jim Corrigan of University Collections hung the pictures late in August but the former couldn't step back and admire the handiwork as her study leave arrived before the last few pictures could be positioned. □

Faculty Women's Club's Year Begins With Fall Membership Tea

The 1986-87 season of the Faculty Women's Club will commence with the Fall Membership Tea on Saturday, 13 September, from 1 to 4 p.m. The tea will be held at Lister Hall.

The Faculty Women's Club includes women from all Faculties, wives of faculty members, administrative professional officers, post-doctoral fellows and research associates.

The Club sponsors more than 30 interest groups, for example, gourmet cooking, bridge, book reviews, knitting, French

conversation and an investment group.

A representative from each Faculty serves as liaison for the executive committee and her Faculty members.

The future holds such event the Fall Luncheon (22 October) with guest speaker Margaret Leahey, Chairperson, Alberta Advisory Council on Women's Issues; the Spring Luncheon (4 March); and the Annual Banquet and General Meeting in April at the Derrick Club. □

C-I-L Distinguished Lecturer Travels in Many Orbit

Rutherford Aris will present the 1986 C-I-L Distinguished Lectureship Series in the Department of Chemical Engineering. Furthermore, Professor Aris has set time aside to meet with interested staff and students.

The speaker comes highly recommended by I.G. Dalla Lana who describes him as "an unusually talented and multi-faceted scientist." His interests range as widely as History, Classics, English and Religious Studies. Dr. Dalla Lana told *Folio*.

Two lectures—"Poetry and Mathematical Modelling" and "The Stir Tank Forced"—will be delivered by Professor Aris. Underlying the first lecture is "that certain sympathy of intent and activity between the poet and mathematical modeller which allows each to take delight in the craft of the other." An attempt will be made to illustrate these links using an exceedingly elementary model of population growth and by reference to some well- (and ...) known poets.

The 11 September (3:30 p.m.) lecture will be preceded by a half hour of coffee and conversation. This lecture and "The Stir Tank Forced" (12 September, 3 p.m.) will be given in 346 Chemical-Mineral Engineering Building.

To help amplify the second topic, Dr. Dalla Lana notes that the response of nonlinear systems to sinusoidal forcing is various and complicated. Some of the ways of disentangling forced oscillation

will be discussed and illustrated by the behavior of a stirred tank.

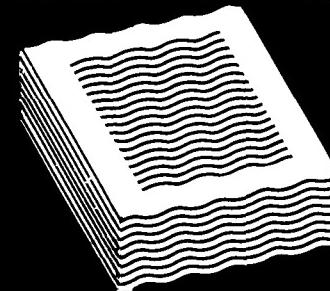

Staff and students interested in meeting with Professor Aris are invited to call 432-3817.

A graduate of the University of London, Rutherford Aris has been with the University of Minnesota for the past 28 years. His versatility, says Dr. Dalla Lana, is legendary at Minnesota and in the chemical engineering profession. In addition to his courses such as "Mathematical Methods" and "Chemical Reactor Analysis", he has offered courses on "Medieval Manuscripts" and the "History of Latin Handwriting", prepared a monography on medieval paleography, collaborated with a colleague in History on developing mathematical techniques for dating documents of the period 900-1150 A.D., and contributed significantly to the development of programs in Religious Studies and in the History of Science at Minnesota.

His use of mathematical analysis in defining and solving problems in such areas of chemical engineering as reaction engineering control, stability, optimization and multicomponent chromatography has been "elegant and pioneering."

C-I-L Inc. has a number of involvements in higher education, not the least of which is the Distinguished Lectureship Series. The firm's cooperation allows the Department of Chemical Engineering to bring to Edmonton each year outstanding engineers and educators. □

Currents

Campus Reviews

As part of the process of carrying out systematic reviews under the guidance of the President's Advisory Committee on Campus Reviews (PACCR), the **Department of Organizational Analysis** is completing the self-study phase of the review process. The other major phase of the process is the site visit and assessment by the Unit Review Committee. In preparation for this second phase, PACCR invites written comment prior to 26 September 1986. Submissions are for the use of the Unit Review Committee and will be held in confidence by the members of that committee.

Submissions should be sent to: Mrs. Shirley Moore, Co-ordinator, PACCR Office, W4-13 Chemistry Building, Attention: The Organizational Analysis Unit Review Committee.

Supervised Exercise Program

The University's Fitness Unit will hold its next Supervised Exercise Program for 10 consecutive weeks beginning 15 September. Classes will take place from noon until 1 p.m. or 4:30 to 5:30 p.m. Mondays, Wednesdays and Fridays. The program includes a pre- and post-fitness test, nutritional counselling, mini lectures, films, handouts, etc. on various fitness and lifestyle topics.

The fee is \$150.

The Fitness Unit is also holding maintenance classes on Tuesdays and Thursdays from noon to 1 p.m. and 4:30 to 5:30 p.m. for people who are already

physically fit or have already taken the program. These classes start on 23 September and run each week until 4 December. The fee is \$80. Registration is on a first-come, first-served basis and is limited.

The contact person is Colleen Stadey, 432-4435.

Faculty Badminton Club

Badminton will be played every Wednesday evening, 7:30 to 10 p.m., in the Education Gymnasium (west end of Education Centre), beginning 10 September. Faculty, research associates, post-doctoral fellows and spouses are welcome; beginners and professionals included. Annual fee: \$10 per person, including cost of birds.

Additional details from Gordon Freeman, 432-3468, Bhalala Paranjape, 432-3586, or Nancy Cyr, 450-5417.

Children's Drama Project

The University/Community Children's Drama Project is being offered again this fall. Classes will be from 4:30 to 5:30 p.m. on Tuesdays (for 6 to 8 year olds) and Wednesdays (for 9 to 11 year olds) beginning the week of 29 September.

For information and registration, call Mrs. Kozub at 432-0430.

Club IDC (Issues in Developing Countries)

Club IDC is a campus organization which provides a forum for all interested individuals to discuss issues of the Third World. The club offers panel discussions and academic lectures followed by interaction between speakers and the audience. In addition to these events, Club IDC will hold a Cultural Evening in November at which international groups on campus will be asked to prepare ethnic dishes.

All interested individuals are invited to the Fall Social on 12 September from 4 to 9 p.m. in the fourth floor lounge of Education North. Raj Pannu (Educational Foundations) will speak briefly on development issues. Following this, there will be free snacks and punch, as well as a cash bar. There will be ethnic music and dancing throughout the evening.

Dean of Nursing

An Advisory Selection Committee has begun its search for a Dean of the Faculty of Nursing. The appointment will take effect July 1, 1987 or as soon as possible thereafter. Suggestions of possible candidates and assessments of the leadership needs of the Faculty are invited.

Nominations or applications for the position, accompanied in the latter case by a detailed resume of qualifications and experience and the names of three referees, should be submitted by December 1, 1986 to:

Dr. J. Peter Meekison
Vice-President (Academic)
3-4 University Hall
University of Alberta
Edmonton, Alberta, T6G 2J9

Replacement Members Needed for Advisory Committee on Women's Studies

The Vice-President's Advisory Committee on Women's Studies is adding replacement members this year. The committee has been in place for two years and is largely responsible for the draft of the new Women's Studies program now being proposed for the Faculty of Arts. While continuing to support that initiative, the committee will now turn to supporting work in Women's Studies in other Faculties within the University, and to developing conduits to help transport information about women's studies among the various University units and with other universities. It will also study the possibilities of a research unit on campus which will enhance interdisciplinary feminist research. □

It is expected that three academic staff members and at least one graduate or undergraduate student will be added to the committee. Persons interested in Women's Studies or who wish to nominate a colleague with interest in this area are asked to telephone Marilyn Assheton-Smith, 432-2556, or Jean Lauber, 432-5490, or drop a note to Leslie Stewart, Administrative Assistant to the Advisory Committee on Women's Studies, c/o the Women's Program, Faculty of Extension (432-3903), by 11 September. A brief note indicating one's academic or personal involvement in women's studies as well as comment on the interest taken in the work of the committee would be appreciated. □

Neil, Vance to Lead New Units in Faculty of Medicine

The Faculty of Medicine is pleased to announce two recent senior appointments to its staff.

David Neil is the Director of the newly created Division of Health Sciences Laboratory Animal Services within the Faculty of Medicine. The various animal units within this division service the Faculty of Medicine in addition to a number of other health science Faculties such as Pharmacy, Dentistry, Home Economics and Physical Education and Recreation.

Dr. Neil's formal training is as a Veterinarian having graduated

from the Faculty of Veterinary Science at Liverpool University in Great Britain. Following his immigration to Canada, he spent some 10 years in Ottawa with the National Research Council and the Health Protection Branch of the Department of National Health and Welfare where he was Chief of the Animal Resources Division until leaving for the United States in 1976. Until his return to Canada this summer, Dr. Neil was Director of Animal Care at Colorado State University. During his previous tenure in Canada, he was very

active in establishing laboratory animal policy, working closely with both CCAC (Canadian Council on Animal Care) and CALAS (Canadian Association for Laboratory Animal Science).

Dennis Vance is the Director of the Lipid and Lipoprotein Research Group, a new interdisciplinary group in the Faculty of Medicine. Within the next two years, Dr. Vance will be recruiting a number of additional investigators to this group that will be housed in the new Heritage Medical Research Building under construction on the north side of the Mackenzie Health Sciences Centre on 87 Avenue.

Prior to his appointment here, Dr. Vance was Professor and Chairman of the Department of Biochemistry at the University of

British Columbia. Over the past years, he has developed an international reputation in the area of lipid metabolism with major contributions in delineating the pathways involved in phosphatidylcholine biosynthesis. Dr. Vance is on the editorial board of the *Biochemical Journal* and *Biochimica Biophysica Acta*. He and his wife, Jean, are the authors of a new text, *Biochemistry of Lipids and Membranes*.

Mark Poznansky, Associate Dean (Research), says that, in conjunction with the arrival of Dr. Vance, the Faculty looks forward, with the support of the Alberta Heritage Foundation for Medical Research, to the development of a first-rate group in lipid and Lipoprotein research. □

(Potential) University Commentators Talk With CBC

Out of the deep, still, pool of talent in our University, 29 people have surfaced and responded to the CBC Radio (Edmonton) request for commentators. According to Susan Freedman, Director of Radio, all potential "performers" have now discussed their interests with her, or a producer, and she'll let us know the outcome.

Several months ago, Freedman talked with her producers and came up with some specific areas where she thought we might have (up to now, hidden) talent. Now, she has a list of members of the University community who are willing to comment on movies, restaurants, music, religion, business, medicine, science and technology, family counselling,

sociology and the visual arts.

There are several gains from such a University/CBC relationship. One is that it gives members of our community an opportunity to tell others out there about the work they are doing in areas that affect people's lives. Another is that it broadens the CBC's range of experts on whom they can call for comment.

If you missed the first invitation, and if you'd like to "break into radio", pick up the 'phone and call Susan Freedman at the CBC, 469-2321, or write to her at CBC, PO Box 555, Edmonton, T5J 2P4. Or call Al Squibb, Director, Office of Public Affairs, 423 Athabasca Hall, 432-2325. □

Chemical Reclamation Program a Money Saver

It is now one year since the program of redistributing surplus chemicals began. About 4,000 containers of materials have been given away to University staff who can use them. The purchase price to University researchers would have been more than \$150,000. "This experience leads us to believe that the program can conserve valuable resources," says Margaret-Ann Armour, Faculty Service Officer in Chemistry.

Copies of the list of currently available chemicals and ordering information can be obtained from Pat Doran, Department of Chemistry (432-5566). The list is also available in file RECYCLE of CSID 'CHGR' and is accessible to those with a sign-on ID on the University's computer. The latter

list is frequently edited to take account of distributed orders. □

Surplus Equipment

The equipment appearing in this column is available only to University departments with University-administered funds. For more information, telephone Jody Brookwell or Roy Bennett, 432-3208.

For Sale: Spectral Dynamics 360 dual channel digital signal processor, complete with 12-bit signal acquisition unit, X-Y display, manuals and transport cases. Performs 1024-point FFT's, auto- and cross-correlations, convolutions, signal averaging, etc. on signals between 0.01 Hz and 150 KHz. Good condition. D. Routledge, Electrical Engineering, 432-5668.

Wanted: Beckman L350 Centrifuge or equivalent, with or without rotors. Good condition. Bruno Miranda, SMRI, 432-3375.

Talks

English

5 September, 2:30 p.m. Andrew Taylor, University of Adelaide, "Nationalism and Internationalism in Contemporary Australian Poetry: Les Murray and John Tranter." 5-20 Humanities Centre.

Alberta Heritage Foundation for Medical Research

8 September, 4 p.m. Jim Kaput, Department of Biochemistry, University of Illinois College of Medicine, "Protein Translocation Through Mitochondrial Membranes Requires Protein Unfolding." 4-70 Medical Sciences Building.

11 September, 12:30 p.m. Brad Bendiak, Research Institute, Hospital for Sick Children, Toronto, "Approaching the Study of Cell-Surface Oligosaccharides as Carriers of Information During Embryonic Development." 2-27 Medical Sciences Building.

11 September, 4 p.m. Richard Cammack, Department of Biochemistry, University of London, King's College, "What is the Purpose of Iron-Sulfur Clusters in Biology?" 2J402 Mackenzie Health Sciences Centre.

Anatomy

9 September, 4 p.m. Chris Lau, Associate Investigator, Howard Hughes Medical Institute Research Laboratories, San Francisco, "Molecular Biology of Mammalian Sex Differentiation." 6-28 Medical Sciences Building.

Clothing and Textiles and Edmonton Needlecraft Guild

9 September, 8 p.m. Joy Clucas, textile artist, author and lecturer from England, will present a slide/lecture. Admission \$2 at the door. 2-115 Education North.

St. Joseph's College

10 September, 7:45 a.m. Faculty Breakfast—Bruce Miller, United Church chaplain, "The Place of Theological

Inquiry Within the Broader University Enterprise." Faculty Club. Kevin Caspersen, 433-4461.

Botany

10 September, 4 p.m. William A. Jensen, Dean of Biological Sciences, Ohio State University, "Development of Wheat Pollen and the Effect of a Chemical Hybridizing Agent." M-149 Biological Sciences Building.

Standards Engineering Society

10 September, 6 p.m. Allan F. Bailey, Public Relations Manager, Canadian Standards Association, Rexdale, Ontario, "Free Trade and Standards." Faculty Club. Cost is \$10 for members and guests. Call Karl Porukas (427-3091) by 8 September.

C-I-L Distinguished Lecturer

11 September, 3 p.m. Rutherford Aris, University of Minnesota, "Poetry and Mathematical Modelling." 346 Chemical-Mineral Engineering Building. 12 September, 3 p.m. Professor Aris, "The Stir Tank Forced." 346 Chemical-Mineral Engineering Building.

Edmonton Chapter, Canadian Mediterranean Institute

11 September, 7:30 p.m. Rosemary Nielsen and Robert Buck, "Greek Lyric Poet Simonides of Ceos and 'The Female Condition'." Lecture Room, Provincial Museum.

The Arts

Beaver House Gallery

Until 20 September, "From Edmonton to Tokyo"—an exchange exhibition of printmaking students from the University of Alberta and the Tokyo National University of Fine Arts and Music.

Early September News Watch

Stan Teply has been listening intently to Brahms. The Professor of Transportation Engineering acted as Faculty Advisor for this University's Student Chapter of the Institute of Transportation Engineers (ITE). He was recently informed by Thomas Brahms, Executive Director of ITE, that the Chapter, along with the University of Missouri-Rolla Student Chapter, will receive honorable mention at ITE's annual business meeting in Indianapolis, 9 September. (Purdue University was selected as the 1986 Student Chapter Award recipient from among the Institute's 60 Student Chapters.)

During the past year, the University of Alberta Chapter's activities included technical presentations, field trips, promotions and public service events. The Chapter continued to receive "unofficial" support from the Department of Civil Engineering, the City of Edmonton Transportation Department, and the transportation-engineering consulting community.

432-BEAR

People in the Department of Athletics number Doug Grant (Psychology) among their friends. Professor Grant, whose office number of 432-2327 contained the call letters B-E-A-R, readily offered the department use of the number for informational and promotional purposes.

To reach the Department of Athletics, which includes intercollegiate coaches, marketing and public relations, Summer Sports Camps, and the Sports Information Office, dial 432-BEAR.

Arts Building

People from all departments and units in the Arts Building are alive and well in their temporary quarters in the trailer communities on the site of the former Algonquin Apartments and the area between Cameron Library and the Earth Sciences Building. The few pieces of furniture left behind will be taken care of shortly and the Arts Building will be turned over to the contractor, PCL-Maxamant Venture, on or about 5 September.

Hoarding should go up on 15 September.

The estimated date of completion of the renovation work is 30 October 1987. Commissioning and the correcting of any deficiencies will take place in November and carpeting and new furnishings will

be installed in December.

The restored Arts Building will be occupied early in the new year.

Registration

Registrar Brian Silzer reports that telephone registration has "gone incredibly well." He was referring to both the technical side of the operation and the collaboration exhibited by Faculties and departments and Registrar's and Office of Administrative Systems' staff.

The only concern voiced by Mr. Silzer was that students might think that once they had registered over the phone they had only to show up for classes. They still had to come on campus on 2 or 3 September to pick up their timetables, thereby confirming their registration.

Early indications were that there would be at least as many students as last year.

Movie Extras Sought

The stats are eye-popping. Games played: 522. Games won: 502. Olympic (exhibition) competition: a perfect record of 27 wins and no losses. Points for (at four Olympiads): 1,863. Points against: 297.

The Edmonton Grads ruled the basketball court from 1915 until their last game in 1940. James Naismith, the inventor of the game, called the Grads "the finest basketball team that ever stepped out on a floor." Their story is about to be put on celluloid by Stein/MacLean Productions Ltd. of Edmonton and the National Film Board of Canada. "Shooting Stars: The Amazing Story of the Edmonton Grads" will be filmed from 10 to 15 September. Extras are required to be "the crowd of fans" during a re-creation of a game from the mid-1930s. The Prince of Wales Armory will serve as the set. Shooting will take place all day Saturday, 13 September. Remember to wear '30s-style clothing, for example, pleated front trousers in dark colors, white shirts, jackets, cloth caps or fedoras for men, and mid-calf length skirts in dark colors, blouses and straw hats for women.

Door prizes, food and fun are promised.

To be a part of the action, telephone 426-6435 between 9 a.m. and noon weekdays.

"Shooting Stars" will be aired on television in Alberta in March 1987. □

Positions

The University of Alberta is committed to the principle of equal opportunity in employment and encourages applications from all qualified people.

In accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Academic

Assistant Curriculum Librarian, Herbert T. Coutts (Education) Library

The University of Alberta invites applications for an Assistant Librarian for the Curriculum Library. Duties will include the provision of reference service using instructional materials for the kindergarten to grade XII curriculum, library instruction, collection development, cataloguing of audio-visual materials, and liaison with faculty.

The successful candidate will have a degree in Library Science from an accredited institution and preferably a professional degree in Education. A background in teaching and a knowledge of the Alberta School Curriculum; or equivalent experience in an education library will be an asset. This is a permanent position which will be filled at the Librarian I-II level, with a minimum salary of \$25,792.

Candidate should send a current curriculum vitae, transcripts of academic record and the names of three references to John Teskey, Personnel Officer, Cameron Library, University of Alberta, Edmonton, Alberta T6G 2J8.

Closing date for applications is 30 September 1986.

Collection Coordinator

The University of Alberta invites applications for the position of Collection Coordinator.

As a member of the Library's senior management team this position will be responsible to the Chief Librarian to ensure that the collection activity of the Library system reflects the needs of the University of Alberta, in a setting where the primary responsibility for collection management resides in the area libraries.

To accomplish this the incumbent will oversee the development of the Library's collection policy and assist the development of local collection policies. The collection coordinator will monitor the development of the collection with particular emphasis on interdisciplinary and multidisciplinary concerns. This will involve considerable data gathering and analysis to enable the incumbent to advise the Chief Librarian and others as required.

The Collection Coordinator will collect the information required and advise on the administration and allocation of a collections budget of some \$4 million. Special attention will need to be devoted to the preparation of outside funding proposals and the subsequent administration of such funds. The incumbent will also be expected to develop and present training programs in the area of collection management.

This position will also have responsibility for the preservation and conservation activity of the Library system.

The successful candidate will have a degree in Library Science from an accredited School of Library and Information Science, as well as an extensive background in Collection Management. Candidates must have

significant managerial experience in academic libraries, strong interpersonal skills, an understanding and appreciation of a research library's responsibilities to its community, and excellent written and oral communication skills.

The position is classified at the Librarian V level, with a beginning salary range of \$45,052 per annum. Candidates should send a curriculum vitae, transcripts of academic record and the names of three references to John Teskey, Personnel Officer, Cameron Library, University of Alberta, Edmonton, Alberta T6G 2J8, prior to 30 September 1986.

Coordinator, East Asian Languages and Literatures Project

The University of Alberta Library invites applications for the position of Coordinator—East Asian Languages and Literatures Project. Funding has been secured to enrich and strengthen the collections in Chinese, Japanese and Korean languages and literatures. It is anticipated that the position of Project Coordinator will continue for two years, with the possibility of a one-year extension.

Reporting to the Area Coordinators, Humanities and Social Sciences and Technical Services, the Project Coordinator will be responsible for the development of a collection plan to meet the needs of an expanding program, and the planning and development of technical processes to provide access to the collection in both the vernacular and romanized format. The nature of the position will require considerable contact with faculty and students.

The successful candidate will have a degree in Library Science from an accredited library school as well as a background in East Asian Languages and Literatures, fluency in Chinese required. A working knowledge of Japanese and Korean would be desirable.

The position is classified at the Librarian III level with a salary range of \$35,044 to \$43,052 per annum. Candidates should send a curriculum vitae, transcripts and academic record, and the names of three references to John Teskey, Personnel Officer, Cameron Library, University of Alberta, Edmonton, Alberta T6G 2J8, prior to 30 September 1986.

Non-Academic

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assinibina Hall, telephone 432-5201. These vacancies cannot be guaranteed beyond the date of publication.

Clerk (Term to 31 March 1987), English, (\$1,109-\$1,371)

Office Services File Clerk, Office of the Registrar, (\$1,109-\$1,371)

Investing for Income

Free

If you're confused about the relative merits of the many alternative income investments, you are not alone. Now, McLeod Young Weir has prepared a brief, easy-to-read booklet which is designed to strip away the mystery and confusion. It will be of particular interest if you are concerned with secure investment income. It also deals with the tax treatment of these various types of investment.

This booklet deals with:

- Interest
- G.I.C.'s
- Mutual Funds
- Term Deposits
- Treasury Bills
- Dividends
- Canada Savings Bonds
- Bonds and Debentures

For your complimentary copy, simply complete and mail this coupon or telephone Ronald J. Hiebert, Investment Executive at (403) 428-1478.

To: McLeod Young Weir Limited
Attn: Ronald J. Hiebert
2300 Oxford Tower
10235-101 Street
Edmonton, Alberta
T5J 3G1

Please send me a complimentary copy of your new booklet entitled "Is Interest Income In My Best Interest?"
